### **Heritage Water Tanks launches new Corrugated Tank range**

Heritage Water Tanks is very excited to announce that we have launched a new range of water tanks with an attractive 1mm corrugated profile.

Knowing the market as we do, we decided to offer an attractive new option to provide our customers with more choices.

Director of Heritage Water Tanks, Mr Murray Tognela said, "We've designed this new product with the same superior quality as our traditional Streamline Tank range, including the same 1mm tank wall thickness and liner quality as before.

"In fact, everything about our new tank, aside from its appearance, is the same as our traditional Streamline product," he said. "Heritage Water Tanks unique gutter system is also compatible with this new product.

"Our tanks have a 20 year pro-rata warranty and have 1mm BlueScope Steel walls, which are much thicker and therefore stronger than many others on the market.

"Heritage Water Tanks also have a superior industrial quality Arma liner that has a density of 700g/m<sup>2</sup>," he said. "This is a measure of our liner's durability which is up to 30% stronger than other tank liners commonly used by our competitors.

"The quality of our products ensures that you can have peace of mind that your tank will last the test of time." Mr Tognela said.

If you would like more information about our new range of corrugated steel water tanks, please contact us on 1800 115 552, e-mail [sales@heritagetanks.com.au](mailto:sales@heritagetanks.com.au) or visit our website at or [www.heritagetanks.com.au](http://www.heritagetanks.com.au)
