

# Setting the Standard for Water Freshness

**ARMA Fresh Tank Liner**  
Certified AS/NZ4020

## Microbe Resistant Water Tank Liner

ARMA Fresh Liner is certified with AS/NZ4020 "Testing of products for use in contact with drinking water," and meets all criteria to be certified as a food grade water tank liner in Australia.

The AS/NZ 4020 Standard requires that products that are compliant do not affect the taste or appearance of water; do not support the growth of microorganisms; and do not release cytotoxic or mutagenic compounds or metals. To be certified by this standard, the product is subjected to a range of rigorous tests.

### How are products tested for microbial growth?

In a test that takes 8 weeks, products are examined for the ability to support bacterial growth by monitoring dissolved oxygen levels. Products are required to comply with all tests relevant for that product type, with respect to acceptable health requirements in Australia.

### How does the ARMA Fresh Liner compare to others?

Heritage Water Tanks ARMA Liner has also been independently tested for resilience and comes out on top in three critical areas. Shear Strength, Tear Strength and Density.

Independent Test Results	Heritage	Company A	Company B
Puncture Resistance Mean Result	1025N	761N	876N
Seam Shear (Weld) Strength Mean Result	57N/MM	36N/MM	41N/MM
Weight per m <sup>2</sup> Mean Result	700g/M <sup>2</sup>	400g/M <sup>2</sup>	460g/M <sup>2</sup>
