

MINING CAMPS AND REMOTE COMMUNITIES

We are specialists in Water Storage Solutions

We supply and install
the highest quality steel water
tanks to the Mining Industry and
Remote Communities in Australia
and internationally

Quality Safety and Reliability

Heritage Water Tanks' range of tanks has been depended upon by major mining companies both in Australia and internationally, to provide specialised storage of wastewater, mine site/camp potable water supply, demineralised water, condensate water, deionised water, dust suppression and fire-fighting water storage solutions.

Heritage Water Tanks ensures that our designs are checked by Engineers to ensure they are correctly designed for maximum strength and integrity to prevail in an earthquake or extreme wind-force conditions such as cyclones.

Tanks can be relocated and recommissioned in a new location if required and are constructed using a jacking system that ensures that the need for working at heights is minimised.

Compliance and Safety

At Heritage Water Tanks, our health, safety, environment and community responsibilities are integrated into everything and underpin the way we do business.

Safe work method statements (SWMS) and Step back assessments (JHA and JSA) are prepared for each site.

Our installers are all trained in Confined Space and Working at Heights, updated every 2 years.

All equipment and vehicles brought to sites are mine site specification compliant and all staff comply with appropriate PPE standards and personal conduct at all times.

Our Liners

Water storage tanks designed for the Commercial and Industrial Sectors in Australia, need liners that are capable of storing a range of liquids of all grades from potable drinking quality water to wastewater. Heritage Water Tanks has access to a range of industrial quality liner materials for the safe and practical storage of water of all types.

At Heritage Water Tanks, we are aware that every job and application is different. So that we can design a Water Storage Tank to suite your requirements, we will take a material sample so that we can match it with the most appropriate liner available.

Each enquiry will be allocated to one of our commercial analysts who are qualified to supply you with the best Heritage Water Tank product available. Our commercial analysts are up to date with all Australian and International regulations concerning the storage of wastewater, treated water and contaminated materials. This will give you confidence in knowing that you are receiving advice from technicians who are experts in their field.
